- Parking Spaces
- Association Fee
- Close To Golf
- Close To Transport
- Gated Community
- Pets Allowed
- Air Conditioning
- Beach Properties
- Close To Schools
- Fully Landscaped
- Investment Opportunities
- Pool

Property Description

Tamarindo Park is a sustainable and eco-friendly community of over 400 acres of land here in Costa Rica. The main important values are the property's natural beauty and rich landscape, along with the wellness and biodiversity of the neighboring national park. Indeed, as part of the project preservation efforts, just 25% of the property is destined for development, leaving 75% undisturbed. Inside Tamarindo Park, you'll find modern tropical homes that blend into the natural surroundings. Designs integrate garden views and large windows so you can embrace nature rather than be sealed off from it. Behind the designs are renowned architects, Richard Muller and Nayib Robles from RM Architecture & Engineering, who specialize in designing elegant contemporary homes in tropical climates. Every house will come with its own pool with sodium hypochlorite water; electricity will be underground. The homes will have high end/quality finishes and materials, such as KOHLER for all bathrooms, Mitsubishi for all AC with 7 year warranty, thermo panels for all roofing and EUROVISTAS insulated windows and movable doors.
